This is my icon.

Cute owl!

Code block

FizzBuzz by Python.

```python
def FizzBuzz(n):
    for i in range(n):
        num = i + 1
        if (num % 15) == 0:
            print('FizzBuzz')
        elif (num % 5) == 0:
            print('Buzz')
        elif (num % 3) == 0:
            print('Fizz')
        else:
            print(num)
```

Math block

Marp Next support KaTex format to write Math equations.

$$\frac{\partial \theta}{\partial t} = \frac{\partial}{\partial z}\left[K(\theta)\left(\frac{\partial \psi}{\partial z} + 1\right)\right]$$

SVG with hyperlinks

my GitHub page

Image source

- You can insert a SVG file with clickable hyperlink
  - `<object type="image/svg+xml" data="img/icon.drawio.svg"></object>`
- To enable this function, you should enable `html` option of MARP

How to use multi-columns mode

In this **default+** theme, a CSS classes, `two-columns`, is defined for splitting one slide into two columns.
You can customize the number of columns, width, etc. by slightly changing the CSS class.

`two-columns` CSS class

```
.two-columns {
    display: grid;
    grid-template-columns: 50% 50%;
    padding-bottom: 10px;
}
```

Markdown/HTML code for using `two-columns`.

```
<div class='two-columns'>
    <div>

Left pane contents

    </div>
    <div>

Right pane

    </div>
</div>

This area is outside the split panes.
```

Two-panes appearance

Left pane

Multi-columns

For simple equal-width columns, you can also use the Tailwind CSS utility (Discussion #192 · marp-team/marp).

```
---
marp: true
style: @import url('https://unpkg.com/tailwindcss@^2/dist/utilities.min.css');
---

# Multi columns in Marp slide

<div class="grid grid-cols-2 gap-2">
<div>

Column 1

</div>
<div>

Column 2

</div>
</div>
```

column 1:

- List
  - Sublist
- List

column 2:

The quick brown fox jumps over the lazy dog.

column 3:

$$\frac{\partial \theta}{\partial t} = \frac{\partial}{\partial z}\left[K(\theta)\left(\frac{\partial \psi}{\partial z} + 1\right)\right]$$

column 4:
